

# Confusing the Delta Facts - Population

The table below is an example of how scientists, funded by the State of California, have been confusing the facts. The legal Delta does NOT include cities with a line through them. The confusion of Delta island names, cities of the Delta, population of the Delta, and Delta island history all began after 2000, when the state started to make its move to take over Delta lands.

**Table 1.** Population Changes in Delta Communities
